Foreword

The Netherlands Scheme for Certification in the Area of IT Security (NSCIB) provides a third-party evaluation and certification service for determining the trustworthiness of Information Technology (IT) security products. Under this NSCIB, TÜV Rheinland Nederland B.V. has the task of issuing certificates for IT security products, as well as for protection profiles and sites.

Part of the procedure is the technical examination (evaluation) of the product, protection profile or site according to the Common Criteria assessment guidelines published by the NSCIB. Evaluations are performed by an IT Security Evaluation Facility (ITSEF) under the oversight of the NSCIB Certification Body, which is operated by TÜV Rheinland Nederland B.V. in cooperation with the Ministry of the Interior and Kingdom Relations.

An ITSEF in the Netherlands is a commercial facility that has been licensed by TÜV Rheinland Nederland B.V. to perform Common Criteria evaluations; a significant requirement for such a license is accreditation to the requirements of ISO Standard 17025 "General requirements for the accreditation of calibration and testing laboratories".

By awarding a Common Criteria certificate, TÜV Rheinland Nederland B.V. asserts that the product or site complies with the security requirements specified in the associated (site) security target, or that the protection profile (PP) complies with the requirements for PP evaluation specified in the Common Criteria for Information Security Evaluation. A (site) security target is a requirements specification document that defines the scope of the evaluation activities.

The consumer should review the (site) security target or protection profile, in addition to this certification report, in order to gain an understanding of any assumptions made during the evaluation, the IT product's intended environment, its security requirements, and the level of confidence (i.e., the evaluation assurance level) that the product or site satisfies the security requirements stated in the (site) security target.

Reproduction of this report is authorized provided the report is reproduced in its entirety.

Recognition of the certificate

Currently the Common Criteria Recognition Arrangement (CCRA) and SOGIS-Mutual Recognition Agreement (SOGIS-MRA) do not cover the recognition of Site Certificates. However, the evaluation process followed all the rules of these agreements and used the agreed supporting document for Site certification *[CCDB]*. Therefore, the results of this evaluation and certification procedure can be re-used by any scheme in a subsequent product evaluation and certification procedure that makes use of the certified site.

Presence of the Common Criteria Recognition Arrangement and SOG-IS logos on the certificate would indicate that this certificate is issued in accordance with the provisions of the CCRA and the SOG-IS agreement and will be recognised by the participating nations. As Site Certificates are not covered, these logos are not present.

1 Executive Summary

This Certification Report states the outcome of the Common Criteria security evaluation of the GlobalLogic Wroclaw. The operator of the site is GlobalLogic located in Wroclaw, Poland, and the sponsor of the evaluation and certification is NXP Semiconductors Germany GmbH located in Hamburg, Germany.

The evaluated site is: GlobalLogic Wroclaw.

The site is used by NXP Business Lines to participate in the activities of Security IC Embedded Software Development (Phase 1), IC Embedded Software and Testing (Phase 1), IC Dedicated Software and Testing (Phase 2). To perform its activities, the site uses corporate IT infrastructures and services remotely, and works according to NXP CCC&S processes.

The site activities are related to Phase 1 and Phase 2 of the seven Phases of the Lifecycle Model as defined in *[PP]*.

The site has been evaluated by Brightsight B.V. located in Delft, The Netherlands. The evaluation was completed on 5 November 2020 with the approval of the ETR. The certification procedure has been conducted in accordance with the provisions of the Netherlands Scheme for Certification in the Area of IT Security *[NSCIB]*.

The scope of the evaluation is defined by the Site Security Target *[SST]*, which identifies assumptions made during the evaluation and the level of confidence (evaluation assurance level) the site is intended to satisfy for product evaluations. Users of this site certification are advised to verify that their own use of, and interaction with, the site is consistent with the Site Security Target, and to give due consideration to the comments, observations and recommendations in this certification report.

The results documented in the evaluation technical report *[ETR]*[1] for this site provide sufficient evidence that it meets the EAL6 assurance components: ALC_CMC.5, ALC_CMS.5, ALC_DVS.2 at AVA_VAN.5 level, and ALC_LCD.1.

The evaluation was conducted using the Common Methodology for Information Technology Security Evaluation, Version 3.1 Revision 5 *[CEM]* and the Supporting Document Guidance CCDB-2007-11-001 Site Certification, October 2007, version 1.0, Revision 1 *[CCDB]*, for conformance to the Common Criteria for Information Technology Security Evaluation, version 3.1 Revision 5 *[CC]*.

TÜV Rheinland Nederland B.V., as the NSCIB Certification Body, declares that the evaluation meets all the conditions of the Common Criteria and that the site will be listed on the NSCIB Certificates list. It should be noted that the certification results only apply to the specific site, used in the manner defined in the *[SST]*.

---

[1] The Evaluation Technical Report contains information proprietary to the developer and/or the evaluator, and is not releasable for public review.

2   Certification Results

2.1   Identification of Site

The Target of Evaluation (TOE) for this evaluation is the GlobalLogic Wroclaw located in Wroclaw, Poland.

2.2   Scope: Physical

This site certification considers a single building location occupied by GlobalLogic Wroclaw.

The area where the relevant activities take place is limited to two secured areas on one floor of the building: a Development Room, and an IT Server Room.

2.3   Scope: Logical

The site is used by NXP Business Lines to participate in the activities of Security IC Embedded Software Development (Phase 1), IC Embedded Software and Testing (Phase 1), IC Dedicated Software and Testing (Phase 2). To perform its activities, the site uses corporate IT infrastructures and services remotely, and works according to NXP CCC&S processes.

The site activities are related to Phase 1 and Phase 2 of the seven Phases of the Lifecycle Model as defined in *[PP]*.

Within those phases, the site is involved in

- ➢ ALC_DVS to control access to the assets (at AVA_VAN.5 level).
- ➢ ALC_CMC/CMS to handle the site internal documentation and TOE development related configuration items.
- ➢ ALC_LCD as a service related to TOE development and testing.

2.4   Evaluation approach

The evaluation is a first evaluation.

In the evaluation all evaluator actions have been performed including both in-person and remote site visits. For assessment of the ALC_DVS aspects, the Minimum Site Security Requirements *[MSSR]* have been used.

2.5   Results of the Evaluation

The evaluation lab documented their evaluation results in the *[ETR]*[2] which references other evaluator documents. To support re-use of the site evaluation activities a derived document *[STAR]*[3] was provided and approved. This document provides details of the site evaluation that have to be considered when this site is used in a product evaluation.

The evaluation lab concluded that the site meets the assurance requirements listed in the *[SST]* as assessed in accordance with *[CC], [CEM]* and *[CCDB]*.

2.6   Comments/Recommendations

The Site Security Target (*[SST]*) contains necessary information about the usage of the site. During a product evaluation, the evidence for the fulfillment of the Assumptions listed in the *[SST]* shall be examined by the evaluator of the product when re-using the results of this site evaluation.

---

[2] The Evaluation Technical Report contains information proprietary to the developer and/or the evaluator, and is not releasable for public review.

[3] The Site Technical Audit Report contains information necessary to an evaluation lab and certification body for the reuse of the site audit report in a TOE evaluation.

3   Site Security Target

The Site Security Target - GlobalLogic Wroclaw, NXPOMS-1719007347-4154, Rev. 1.6, 13 October 2020 *[SST]* is included here by reference.
